AIA-25
Barrier Free Shower Design and Techniques

Provider: LATICRETE International, Inc. (J-037)

Program: Barrier Free Shower Design and Techniques

Program #: AIA-25

Credits: 1 LU Hour - LU, HSW

Description:

The tile industry has seen an increased requirement for barrier free shower systems. Barrier free shower systems provide a wider range of versatility to the designer and the more common use of large format tile. The barrier-free system allows for easier access into the shower system for people with disabilities.

Learning Objectives:

At the end of the program, the participant will be able to:

1. Identify what a barrier free shower is.
2. Learn about new lightweight more ecofriendly materials available for shower installations.
3. Proper installation methods and materials to reduce the potential for mold and mildew.
4. The reduction of carbon footprint by using lightweight materials, less labor, less time, and fewer materials.
5. Understand building codes requirements, laws, and industry standards for barrier free installation.

Approach:

A PowerPoint presentation that incorporates photo images, and computer animation will be used. There will be a questions and answer period at the end of the program, however, the program is designed to be interactive, and questions are encouraged throughout as well.

A/V Needed:

Electric power, projector and a screen, video system or blank wall for the PowerPoint presentation. (The CES facilitator will provide the laptop).

Target Audience:

Architects, Engineers, Specifiers, Owners and other Design Professionals in the commercial, residential, and industrial ceramic tile and stone markets.

Cost: Not Applicable. There is no fee for bringing this program into a firm or chapter meeting.
